## OBJECTIVES

Armstrong Community Music School wanted a provider to take care of ongoing tuition as well as daily transactions in store. They wanted to save staff time sending and processing monthly tuition payments and have everything in one place.

## SOLUTIONS

We recommended an online gateway that allowed set up of recurring payments and connected to their website.

## BENEFITS

In addition to the gateway, we provided updated hardware and training for the front desk staff. Linking the two systems together gave one website where all reporting can be seen for business decisions. We saved staff time on input of invoices and customer card data each month by automating. Significant cost savings on transactions gave this non-profit a financial boost.
